Trained and Have the
Expertise to Test - Inspect -
Service GE/Edwards and Most
Other Major Brands.

NFPA National Fire Alarm Code

NFPA 72

The National Fire Protection Association recommends periodic inspection and testing of smoke detectors at their installed locations as stated by the National Fire Alarm Code.

This code applies to institutions (i.e. hospitals, nursing homes, correctional facilities) determined by Federal Regulations, or by the AHJ (Authority Having Jurisdiction, State Fire Marshal). The test includes a calibrated sensitivity test to assure that;

- (1) each detector is within its listed sensitivity range, and
- (2) each detector will initiate an alarm when exposed to smoke of certain concentrations.

NAC DIVISIONS IS A MEMBER OF

NAC DIVISIONS OFFERS THE FOLLOWING SERVICES:

SECURITY SYSTEMS - FIRE ALARM SYSTEMS - FIRE ALARM INSPECTION AND SENSITIVITY REPORTS
24 HOUR MONITORING - ACCESS CONTROL - VIDEO SURVEILLANCE - TELEPHONE - DATA WIRING - SOUND
